

Name: Ubair Yaseen Shah

E-mail: ubairyaseen9@gmail.com

Supervisor: Prof. Shakil A. Romshoo

Co-supervisor: Dr. Reyaz Ahmad Dar

Research Area: Glaciology

Research Interests:

I am interested in reconstruction of paleo-glaciation of the Kashmir Himalayan region employing ground and satellite observations. I am also interested in understanding the behavior and dynamics of Himalayan glaciers in response to climate variability. Currently, my work is focused on the glaciological, geodetic and geo-chronological approaches for understanding glacier dynamics of the Hoksar glacier in the Kashmir valley.

Publications:

Ubair Yaseen Shah and Irfan Rashid. Geodetic mass balance of a few selected glaciers in Kashmir Himlaya from 1912-2013. 13th J&K Science Congress, April 2018, University of Kashmir, Hazratbal Srinagar.
